

# 3G WIFI Router

Nepal Telecom's 3G wireless Router creates a local Wi-Fi hotspot or Wi-Fi zone to provide access to the Internet. All laptops, tablets, etc., which have Wi-Fi built-in can share the hotspot for Internet access. Internet can be also accessed via RJ45 cable.

It can be used in both the urban and rural areas and the internet is accessible in all 75 districts of the country. It is portable and hence can be used while travelling as well and for field works. At least 8-10 users can access the internet simultaneously.

It comes with 3000 Mah battery and provides back-up for 6-8 hours. It, thus, can be used as power bank. It can be used as Repeater also. The offline storage facility is also provided via micro SD Card up to 64 GB.
