Smart security panel kit

Smart Security Kit for Homes and Offices is a kit that provides you real-time security for your property no matter where you are this consists of alarm sensors that works accordingly to keep your house from any intruders

Smart Security box

The Smart Security Cube for Homes and Offices offers real-time protection for your property, no matter where you are. It includes alarm sensors that activate to prevent intrusions, ensuring your home or office remains secure at all times.

Smart doorlock

A smart door lock is an electronic lock controllable via smartphone apps or other devices. It offers keyless entry via PIN codes, biometric authentication, and remote unlocking. They enhance security, convenience, and integrate with smart home systems for automation and monitoring.
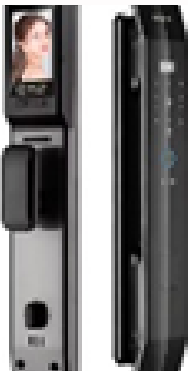

Smart glass panel doorlock

A smart glass door lock is an electronic lock designed for large glass doors in offices, controlled remotely via a smartphone app. It offers keyless entry through PIN codes, biometrics, or mobile unlocking, enhancing security and convenience. It integrates with smart office systems for seamless automation and entry monitoring.

Smart video doorlock

A smart video doorbell is designed for home entrances, allowing remote monitoring and communication via a smartphone app. It features motion detection, two-way audio, night vision, and cloud storage for recordings, enhancing home security and convenience with seamless integration into smart home systems.

Smart fingerprint doorlock

A smart door lock is an electronic lock remotely controlled via a smartphone app, offering keyless entry through PIN codes, biometrics, or mobile unlocking. It enhances security and convenience, integrating with smart home systems for seamless automation and entry monitoring.

Outdoor video doorbell

A smart video doorbell is a device that integrates a doorbell with a video camera, allowing homeowners to see and communicate with visitors remotely via a mobile app. It typically includes features such as motion detection, two-way audio, night vision, and cloud storage for video recordings. Smart video doorbells enhance home security by providing real-time monitoring and interaction, even when homeowners are not physically present.

Indoor Video doorbell

A smart indoor video camera lets you monitor and communicate with visitors remotely via a mobile app. Features include motion detection, two-way audio, night vision, and cloud storage for recordings, enhancing home security with real-time monitoring and interaction.

Intelligent PTZ camera

This is a 4MP outdoor security camera with a 3.6mm wide-angle lens (110° view). It has 4 infrared and 4 white light LEDs for night vision, supports motion detection and siren alarms, and features auto-tracking. Designed for outdoor use (IP65), it operates on DC5V1.5A or DC12V1A power via Type C cable, and functions in temperatures from -10℃ to +50℃.

Smart smoke detector

A smoke sensor for home security detects smoke in residential spaces, triggering an alarm to alert occupants of potential fire hazards, ensuring early warning and safety.

Gas leakage detector

A gas detector sensor detects the presence of gases like carbon monoxide, methane, propane, and others in the air. It triggers alerts when gas levels reach unsafe concentrations, ensuring safety in industrial, commercial, and residential settings.

Door/window sensor

Door and window sensors are key components of any home security system. They detect unauthorized entry or attempted break-ins by alerting homeowners when doors or windows are opened or closed.

Waterlevel controller

Smart overhead water tank controllers monitor water levels in overhead tanks and automate the process of filling or emptying tanks based on preset parameters. They ensure adequate water supply while preventing overflow or shortages.

Smart switch 1 gang

This 1-gang smart switch connects to Wi-Fi and Bluetooth, allowing remote control of lights and appliances via the Tuya app. It features easy installation, a sleek design, and smartphone compatibility. Perfect for modern home upgrades.

Smart switch 4 gang

This smart switch panel seamlessly integrates with your home's Wi-Fi and Bluetooth networks, allowing you to control your lights and appliances remotely. Its compatibility with the Tuya app ensures easy management from your smartphone. With a sleek design and easy installation, this switch panel is a must-have for modernizing your home.

Smart switch 3 gang

This 3-gang smart switch effortlessly connects to your home's Wi-Fi and Bluetooth networks, enabling remote control of your lights and appliances. Compatible with the Tuya app, it allows for simple management from your smartphone. Featuring a sleek design and easy installation, this switch panel is an essential upgrade for a modern home.

Smart switch 2 gang

This 2-gang smart switch easily integrates with your home's Wi-Fi and Bluetooth networks, allowing you to control lights and appliances remotely. Compatible with the Tuya app, you can conveniently manage everything from your smartphone. Its stylish design and straightforward installation make this switch panel ideal for modernizing your home.

Smart switch module

Features:
- Hand-Free Voice Control
- Group-Control Function
- Energy Monitor Function
- Timer, Schedule & Countdown Function
- Status Memory
- Family Share Function

Smart plug 16A with energy monitor

Smart Plug, which connects into both the appliance and the wall outlet. You can now monitor and quickly turn on/off any small appliance in your house using the Tuya Smart/Smart Life App on your iOS or Android smartphone

Smart WI-FI plug 10A

A Smart Wi-Fi Plug 10A is a compact device that plugs into a standard electrical outlet, allowing remote control via Wi-Fi connectivity. It supports devices up to 10 amps, enabling convenient automation of appliances in a smart home setup.
